Score	7.35	6.87	7.01	7.28	7.80	7.70	7.70	7.90	8.20	8	8	8.30	8.30	8.30	8.30

Year	2009	2010	2011
Score	8.30	8.30	8.60

Operational Definitions

The score on Corruption Perceptions Index (CPI), which is a “poll of polls” conducted by the Transparency International (TI) and Goettingen University drawing upon numerous distinct surveys of expert and general public views of the extent of corruption in many countries around the world. It relates to perceptions of the degree of corruption as seen by businesspeople, risk analysts and the general public and ranges between 10 (highly clean) and 0 (highly corrupt).

Footnote

All figures are collected from Transparency International Corruption since 1981.

Figure for 1981 refers to data from surveys conducted during the years from 1980-85. Figures for 1991 refers to data from surveys conducted during the years from 1988-1992. Figures for 1986 is not available.
